	Black	1800 N/A

Ink/Thread Color Equivalency Chart

If you need to have coordinating thread and ink colors, please use the chart on the left. Colors may not be an exact match.

When specifying a color, please note numbers listed in the thread and ink color columns, not the Pantone® equivalent. Only list Pantone® color if desired color is not found; PMS matching is available for a fee.

Due to many factors, we cannot guarantee that the colors displayed on our web site will exactly match the final finished piece. Your computer monitor/screen settings may influence how the colors are displayed depending on the individual monitors brightness and contrast settings. Likewise, printouts of the chart may also differ from final finished piece due to differences in software program's color settings, and toner differences.
